DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. ¹¹ Claims 1-9, drawn to a method of reducing or inhibiting cell hyperplasia and restoring vessel wall biocompatibility, comprising administering orally an amount of 13-hydroxyoctadeca-9Z, 11E-dienoic acid.
 - II. ^{10, 12-13} Claims 10-13, drawn to a method of correcting the inhibition of endogenous 13-HODE synthesis by omega-3 fatty acids by incorporating 13-HODE into formulations of omega-3 fatty acids.
 - III. Claims 27-32, drawn to a use of the claimed composition to treat a disease or condition, comprising administering orally an amount of 13-hydroxyoctadeca-9Z, 11E-dienoic acid.

It is noted that product claims 14-26 will be examined to the extent that they read on the elected invention because they contain common limitations for Group I-III.

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant invention the Invention I is distinctive from Invention II because of different modes of operation and different functions as described above. Invention III is distinctive from Invention I-II because Invention III method can be practiced with a different modes of operation and different function, for example by "inhibiting Protein Kinase C activity" or "inhibiting Mitogen Activated Protein

Art Unit: 1614

Kinase activity”; “inhibiting aromatase” described in US 5102912; and “by inhibiting angiotensin I-converting enzyme” described in JP 62164622.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

2. If Applicant elects Group III invention, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of disease or condition. Moreover, whatever specific diseases or conditions is ultimately elected, applicants are required to list all claims readable thereon.

With the election of a specific exemplified compound, a generic concept will be identified by the examiner as the inventive group for examination.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1614

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Kwon whose telephone number is (703) 308-5377. The examiner can normally be reached Tuesday through Friday from 9:00 am to 7:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel, can be reached on (703) 308-4725. The fax number for this Group is (703) 308-4556.

Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1235.
